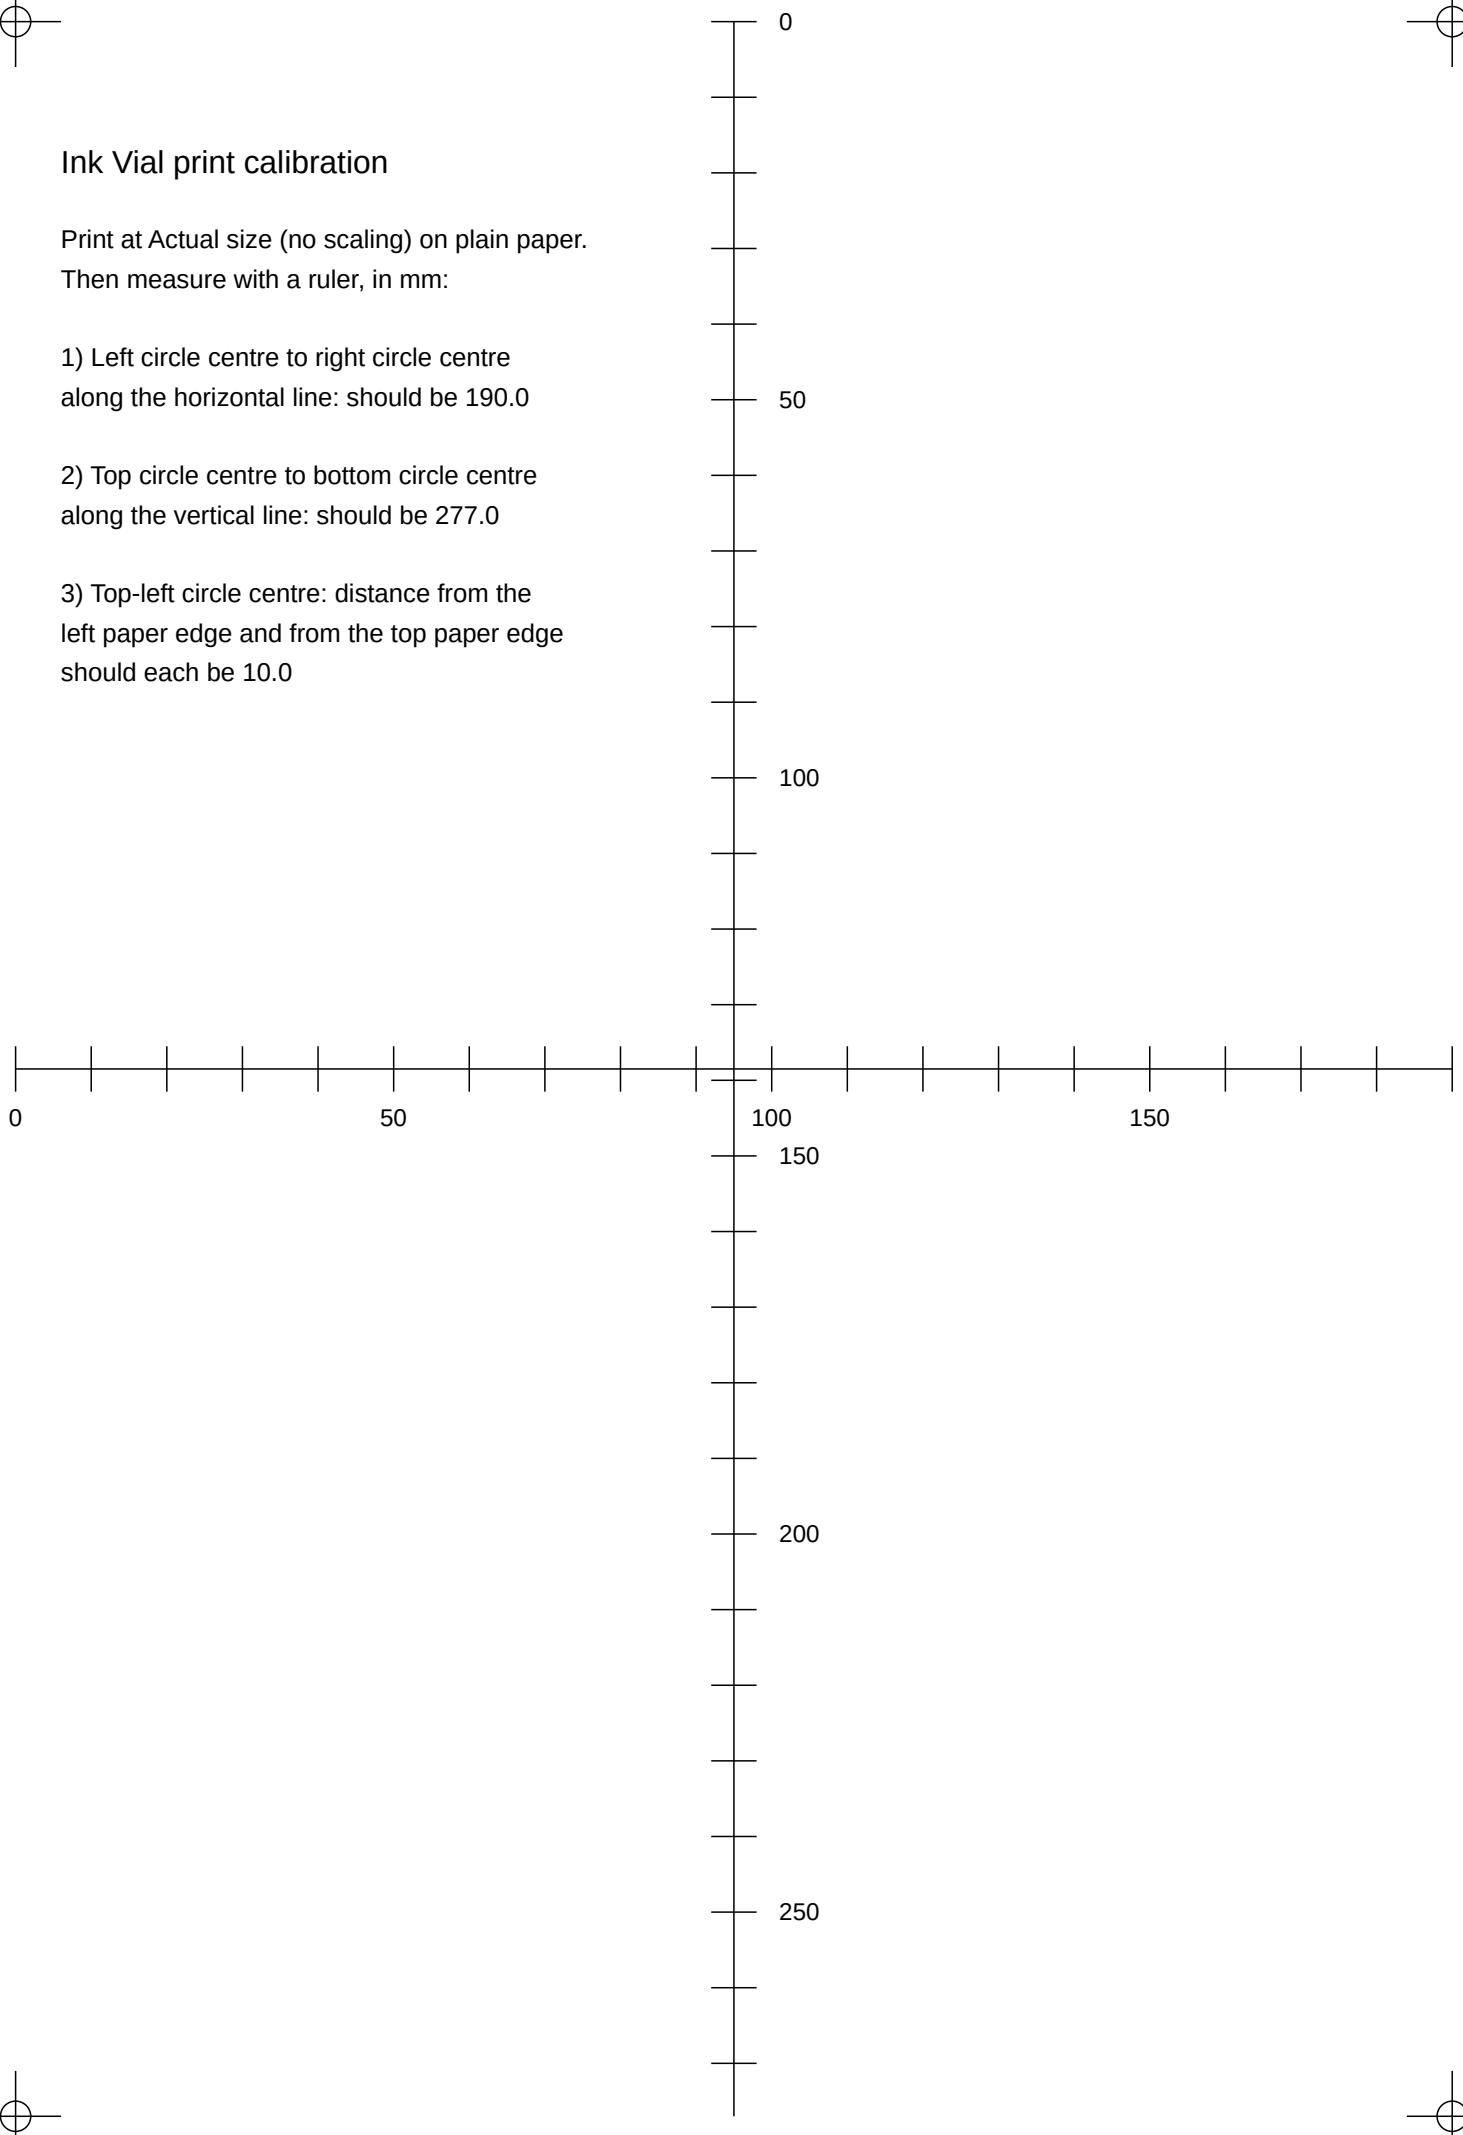
Ink Vial print calibration

Print at Actual size (no scaling) on plain paper.
Then measure with a ruler, in mm:

1) Left circle centre to right circle centre
along the horizontal line: should be 190.0

2) Top circle centre to bottom circle centre
along the vertical line: should be 277.0


3) Top-left circle centre: distance from the
left paper edge and from the top paper edge
should each be 10.0
